---

Jason,

Looking for status on GM 6.6l Duramax Diesel 2011 MY AECD review. Attached is the most recent question / answer correspondence with EPA from early December. FYI - we did provide to EPA Washington & Ann Arbor updated / final AECD documents in three e-mails sent last week on January 25. In addition, we met with CARB LD/HD staff in El Monte on January 28th to review in detail our AECD's. Attached is copy of overview presentation from that meeting. We also provided CARB with hard copies in binders of that 300+ page document. CARB/GM have agreed to schedule follow-up conference call the week of February 8th.

Would like to know if you have any additional questions regarding our AECD submission. Please respond regarding preferred next steps (e.g. conference calls, meetings, etc.). FYI - we did submit our HD 2011 MY Application for Certification to EPA Washington on December 23rd. Look forward to your reply. Thanks.

Randy

submission [Link](#)

Hello Jason -

I am going to respond in blue below for clarity.

Feel free to call or email for any clarifications or with questions.

My plan is to have the updated versions of the AECDs and documents available before the holidays. We are doing a final data validation review tomorrow on the EDE.

Thank you -  
Rob

Andrew,

Submit the AECD document as one PDF document in the future. Understood - no problem

Includes system block diagrams. Also, no problem. I assume you are looking specifically for an overall system overview (major engine / AT components diagram) -- correct me if incorrectly interpreted.
